## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-15, drawn to a method of improving a cereal product, classified in class 426, subclass 618.
- II. Claims 16-20, drawn to a method of reducing the friability of a potato chip, classified in class 426, subclass 637.
- III. Claims 21-31, drawn to a method of increasing the shelf life of a nut, classified in class 426, subclass 632.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effect because each of the inventions has a different effect on the product being processed.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

Claim 9 is generic to a plurality of disclosed patentably distinct species comprising cereal products from corn, wheat, oat, barley and rice. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claim 1 and 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The last line of claim 1 is confusing in the recitation "thereby improving reducing the cereal product."

Claim 9 depends from itself. Also there is not antecedent basis in the claims for "said flaked cereal".

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
